ROUND 1 – MRO – POWERBIKE TOUR

Following a successful test day on Friday 19th Marc was happy that the bike was set up to his satisfaction and he was the fastest RSV out there, a few small changes to suspension set up and gearing were made ready for the following day, due to weather conditions.

Saturday was a good all round day using the Super Twins race as extra practice for the real thing the next day. Marc started race 1 in 31st position on the grid and ended up finishing 8th overall. The 8th place the gave him a good set up for the grid on the next race. Starting from the grid position 8 he then went on to finish 2nd, the only RSV rider to challenge the tuned up bikes on slicks! And also the only RSV rider to finish in the top 10!

Race Day

After a good two days of practice and some of the worst weather available Marc was feeling good about today!

Practice in the morning went well and qualifying even better!! To walk away with POLE POSITION on the 1st meeting was great and the only rider to break the 1:14's lap. The race was really close with Marc leading the first few laps, a slip in the gears allowed Jones to pass but not get away followed by a slide and the end of the start/finish line, but despite that Marc held on and gained on Jones once again, only to finish 0.06 seconds behind! It was a real fight and Marc walked away with the fastest lap under his belt! Also with a good 20 points towards the championship, and this is only the beginning! With the bike getting better all the time and more track days booked, Marc is really getting off to a good start.
